

MOUNTING INSTRUCTIONS

For use on sheetrock or wood walls only.

The Oster Wall Mount hair dryer is designed for installation on sheetrock or wood walls only. To mount onto wall, be sure there are no hidden electrical circuits or pipes in the mounting location.

Follow these instructions:

1. Remove wall bracket from the unit.
2. Use the bracket as template to mark position of holes for drilling close to electrical outlet, away from tub or sink.
3. Drill three 3/16 inch holes.
4. Insert the three anchor bushings by tapping lightly with a hammer until the shoulder of the bushing rests against the wall.
5. Position wall bracket and tighten the two bottom screws first, then tighten the top screw. (Anchor bushings and screws are provided for you.)
6. Match the slots on the back of the mounting base with the hooks on the bracket.
7. Press bracket onto the hooks and slide down to insure secure mounting.
8. Plug the unit into the nearby electrical outlet (110-120 volt, 60 cycle AC only).

DANGER- To reduce risk of electrocution, do not install where unit can fall into tub or sink.
